

# Paper Mache Globe

Instructions for making a globe using paper mache' techniques - submitted by Meghan.

## **Materials Needed:**

- Large, Round Balloon
- Newspaper
- Paper Mache Paste
- Blue and Green Paint
- Paintbrush
- String

## **Instructions:**

Blow up the balloon and tie tightly. Cut or rip strips of newspaper and dip them into the paper mache paste (be sure to drench the paper). Allow the children to get dirty, and apply several layers of paper mache to the balloons in order to make sure it holds.

Let the paper mached balloons dry overnight. Tie string to the tied end of the balloon in a loop so that it can be hung up.

Now look at a map of the world, see all the different continents and oceans. Now you need to paint your globe with the green and blue paint, so that it has all the countries and oceans on it.

Let it dry over night and then hang it up and enjoy.
